

Originally a Thai Restaurant and Take Away unit with a very traditional style in the heart of Bedford Town Centre, we were tasked with transforming it into a modern atmospheric restaurant that not only captured a little of Thailand's evocative ambience, but complimented the owners ability to provide fantastic Thai cuisine and unrivalled hospitality

With a very tight budget, creativity was needed to maximise as much of the existing finishes that could be re-used successfully, mixed with new details and ideas to meet the clients brief.

A crisp modern palette of colours were used, complimented by the introduction of traditional elements such as bamboo and fret cut timberwork to form wall cladding and screens, and light fittings sourced direct from Thailand. These items make the design unmistakably Thai, but with contemporary influences to stand out from the norm.
